Education:

EST | Computer Science | 2017 -> 2019:

skills: C, C++, C#, Java, Sql, Web, Computer Architecture, AI, Communication

1337 | Computer Science | 2021 -> 2023:

skills: peer2peer learning, algorithms, Graphics, System Architecture, Linux, Networking, Web, Game Dev

Experiences:

KOIOS | Full Stack Devloper | Jan 2020 -> Dec 2021:

- Design and implement web applications
- App Deployments
- Devops task, e.g implement ci/cd pipelines
- Server management
- Ensure the security of the application and server environment
- using agile methodology
- help new developers understand projects architecture

skills: **Angular, Lumen, Laravel, Expressjs, Linux,
Git, Bash, Nuxtjs, Mysql, Mongodb, Elasticsearch, Docker, Nestjs, Nodejs**

WINNR | Full Stack Developer | Jan 2021 -> Mar 2021:

- Add new features to the Saas app (https://winnr.gg)
- Maintain existing features
- Fix bugs
- Implements CI/CD pipeline
- Audit app performance and address possible bottlenecks
- Help with deployment
- Follow best practices for technologies, frameworks, restapi design
- perform cross code reviews with other members of the team to ensure high quality code
- using agile methodology

skills: **Firebase, Angular, GCP, Linux, Git, Bash, Lighthouse, Server Side Rendering, Perl**

IT ROAD CONSULTING | Fullstack Developer | Apr 2021 -> Nov 2022:

- Implement High Quality designs into web apps
- connect frontend with backend using rest api's
- create responsive web apps
- port web apps into mobile
- cross team collaboration to design and implement features
- using agile methodology
- use e2e testing to ensure the correct functionning of the application

skills: **React, React Native, Tailwindcss, Figma, Swagger, Spring boot, Postgresql, Bootstrap**

CONSULTANT AT CREDIT AGRICOLE DU MAROC | Fullstack Developer | Nov 2021 -> Nov 2022:

- implement better ui/ux interfaces
- create responsive web apps
- collaborate with other teams to implement the required features
- using agile methodology
- improve the modularity of the frontend app by using microfrontend architecture
- improve security of the frontend using docker
- use e2e testing and test cases to ensure the correct functionning of the application
- provide guidance for new incoming developers to the project

skills: **Angular, Angular Material, Tailwindcss, Adobe XD, Swagger, Spring boot**

ALPHA10X | Senior Full Stack Developer | Dec 2023 -> now

- lead design and implementation of full features
- Maintain existing features
- stay up to date on technologies and design patterns

Languages: Frensh, English, Arabic

Interests: Linux, CPU architecture, Web, Mobile, Security
